John Iannone, a former Navy Nuclear Submariner, Senior executive with **35+ years of leadership in engineering, operations, and manufacturing**. Proven success in **new product development, facility construction, automation, and technology implementation** across multiple industries, including data centers, pharmaceuticals, steel, and consumer goods. Recognized for driving **cultural transformation, lean initiatives, and process optimization** that enhance productivity, reduce cost, and strengthen organizational capability.

Beginning his career as a **Nuclear Submarine Supervisor** aboard the USS *Tunny* (SSN-682) and USS Francis Scott Key (SSBN 6876) later serving in engineering leadership at **Johnson & Johnson**, John advanced into senior management roles where he built high-performance teams, grew market leadership, and created lasting shareholder value. A **strategic leader and team builder**, committed to developing talent, instilling a culture of safety, and delivering large-scale projects on time and within budget. Experienced managing programs exceeding **\$60M** and operations involving **1,000+ employees** for IBM, Nucor, Swisher Int., Guardian industries, Cleaver Brooks and others.

John holds an MBA from **Jacksonville University**, a Bachelor of Applied Science degree from **Thomas Edison University**, and is a qualified **Navy Nuclear Power Plant Supervisor**.
