- Strategy Development & Execution

John Marrinucci, a former Navy Nuclear Submariner, founded **Marrinucci & Company** in 2018 to help commercial and military organizations drive transformative change and achieve impactful results. A pioneer in industrial modular manufacturing, John worked hands-on in design, engineering, and implementation, enabling businesses to deploy new processes, products, and operations quickly and with confidence. With more than 40 years of executive leadership, he is recognized for scaling organizations, leading cultural transformation, and delivering sustainable competitive advantage across industrial manufacturing and services, energy, and mission-critical infrastructure.

Beginning his career as a **Nuclear Submarine Officer** aboard the USS *Dallas* (SSN-700) and later serving in engineering leadership at **General Electric**, John advanced into C-suite roles where he built high-performance teams, grew market leadership, and created lasting shareholder value. He led companies ranging from \$25M to \$200M, driving profitable growth, cultural transformation, launching multiple products and completing 15 successful M&A transactions.

John holds an MBA from the **Wharton School, University of Pennsylvania**, a Bachelor of Science degree from the **United States Naval Academy** and is a qualified **Navy Nuclear Engineer**.
